Richtext

Custom field setting:

The screenshot shows a configuration form for a custom field. It has a title bar labeled "Main". The form contains the following fields:

- Field name ***: A text input field containing "long_description".
- Text**: A text input field containing "Detailed description".
- Field type**: A dropdown menu with "Richtext" selected.
- Optional value for select, radio, and checkbox**: An empty text input field.

Result:

The screenshot shows a rich text editor interface. At the top, it is titled "Detailed description". The editor includes a toolbar with various icons for text formatting (bold, italic, underline, text color, background color), lists, links, and other functions. Below the toolbar is a large empty text area. At the bottom of the editor, there is a status bar that displays "Path: p".

File and image upload

Custom field setting:

The image shows a 'Main' configuration window for a custom field. It contains the following elements:

- Field name ***: A text input field containing the word 'screenshot'.
- Text**: A text input field containing the label 'Screenshot picture'.
- Field type**: A dropdown menu with 'File and image upload' selected.
- Optional value for select, radio, and checkbox**: An empty text area.

Result:

The image shows the rendered output of the custom field configuration. It consists of a text input field with the label 'Screenshot picture' and a 'Browse...' button to its right.
